SUMMARY

Full Stack Engineer with 8 months of production experience building AI-powered data platforms, scalable backend services, and real-time analytics systems. Proficient in Next.js, FastAPI, Spring Boot, and PostgreSQL. Shipped ETL pipelines processing 50K+ records daily and REST APIs with sub-200ms response times. Product-aware engineer delivering high-performance solutions in Agile environments.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML/CSS, Tailwind CSS, ShadCN UI

Backend: Spring Boot, FastAPI, Node.js, REST APIs, WebSockets, Microservices

Databases: PostgreSQL, MongoDB, MySQL, Firebase, SQL, Database Design

Data & Systems: ETL Pipelines, Real-time Systems, System Design, API Integration

Tools & Methods: Git, GitHub, Jira, Postman, Figma | Agile, Scrum, Kanban, Sprint Planning

EXPERIENCE

Full Stack Developer Intern

Insight Fusion Analytics (IFA), Mumbai | Nov 2025 – Present

- Engineered production-grade AI and data platforms supporting sports analytics and hiring workflows, serving 3 active product lines with 1K+ daily active users across internal and client-facing dashboards.
- Designed and optimized incremental ETL pipelines in PostgreSQL processing 50K+ records daily, reducing data refresh latency by 40% through batch optimization and indexed query strategies.
- Developed 12+ scalable REST API endpoints enabling real-time data ingestion and evaluation systems with sub-200ms p95 response times under concurrent load.
- Led implementation of the real-time scoring module for IFA SkillQuest, coordinating with design and product teams to deliver the feature 3 days ahead of sprint deadline.

PROJECTS

Backtesting Engine | Next.js | TypeScript | FastAPI | PostgreSQL

- Built full-stack trading strategy platform for backtesting against 5+ years of historical market data with interactive performance visualizations.
- Implemented FastAPI backend with PostgreSQL to simulate strategies and generate metrics (Sharpe ratio, max drawdown, returns) in under 3s per run.

NexPrep AI | Next.js | TypeScript | MongoDB | Firebase

- Built AI-powered mock interview system with real-time evaluation and automated feedback across 10+ job categories with ATS resume parsing.
- Integrated AI-based scoring workflows and secure authentication, achieving 95% uptime across 500+ mock sessions.

Copascore AI | Next.js | Node.js | SportsMonk API | LLM Integration

- Developed AI-driven football analytics system combining real-time SportsMonk API data with LLM-powered analysis for predictive match insights.
- Built automated data ingestion covering 20+ leagues and 500+ teams with 70%+ directional prediction accuracy.

IFA SkillQuest | React | Node.js | MongoDB | JWT

- Engineered gamified hiring assessment platform evaluating cognitive and domain-based competencies across 8 skill dimensions.
- Implemented JWT-based access control and AI-assisted candidate evaluation, reducing manual screening time by 60%.

ACHIEVEMENTS

- 1st Place** – IFA Hackathon; secured internship opportunity based on winning solution.
- Top 5 Finalist** among 60+ teams – Dizzy Hackers Hackathon (Decentralized Identity).
- Top 70 / 500** projects – Vehicle Maintenance Index, World Innovation Expo 2023.

CERTIFICATIONS

- IBM Certified Professional (Coursera) – Product Management | Advanced Java – Spring Boot & Hibernate | Agile Development & Scrum (Coursera)

EDUCATION

B.Tech in Computer Science Engineering (AI & ML)

Presidency University, Bangalore | 2022 – 2026

12th Grade – Shri T.P Bhatia College of Science, Mumbai (2022)
