Summary

Technical Product Manager with strong full-stack engineering experience, building scalable web and AI-based products. Proven ability to own product execution end-to-end—from user research and requirement definition to roadmap planning, cross-functional collaboration, and Agile delivery—while leveraging technical depth to drive high-quality outcomes.

Skills

- **Product Management:** Agile (Scrum, Kanban) | Product Roadmapping | Requirement Gathering & PRDs | User Stories | Backlog Grooming | Feature Prioritization | User Research & Interviews | Stakeholder Management | Prototyping (Figma)
- **Full Stack Development:** React.js | Next.js | Node.js | Spring Boot | Firebase | MongoDB | REST APIs | SQL | Drizzle ORM | Tailwind CSS | ShadCN UI
- **Tools & Analytics:** Jira | Figma | Google Analytics | Notion | GitHub | Postman

Experience

Full Stack Developer Intern, Insight Fusion Analytics Jan 2026 – Present

- Supported hiring, sports analytics, and trading platforms using React.js, Node.js, and modern databases.
- Collaborated in Agile sprints on requirements, prioritization, delivery, and code reviews.

Freelance Product-Focused Web Developer, Self-Employed 2024 – 2025

- Built a lead generation site for Godrej Properties (Kandivali West) with conversion-focused UX and ad integration.
- Developed a corporate website for Max Extrusions from business requirements with responsive, scalable UI.

Projects

- **NexPerp-AI (AI Interview Platform)** – Built a AI interview platform using Next.js, Mongo DB, Firebase owning user research, product roadmap, and automated feedback delivery that improved efficiency by 40%.
- **Decentralized Identity Management (Top 5/60 Teams)** – Developed a DID-based authentication system using React.js and Node.js; led sprint planning and coordinated a 4-member team.
- **CopaScore (Football Analytics Platform)** – Built a football analytics platform delivering match insights and team statistics, contributing to feature planning and full-stack development.
- **Hotel Management System** – Built a scalable backend using Java, Spring Boot, and MySQL; authored API documentation and integrated booking, billing, and staff management modules.

Education

- **B.Tech in Computer Science Engineering (AI & ML)**, Presidency University, Bangalore 2022 – 2026
Relevant Coursework: DBMS, Machine Learning, Software Engineering, Cloud Computing, Product Design.
- **12th Grade**, Shri T.P Bhatia College of Science, Mumbai 2022
Focus: Physics, Chemistry, Mathematics, Computer Science.

Certifications & Recognition

- **IBM Certified Professional** – Product Management.
- **Advanced Java Certification** – Spring Boot, Hibernate.
- **World's Largest Innovation Expo 2023** – Vehicle Maintenance Index selected in Top 70 of 500+ projects.
- **Dizzy Hackers Hackathon** – Top 5 team for Decentralized Identity Management solution.

Leadership & Activities

- **Product Lead, MediaMind-ML-360** – Led a 3-member team, managing sprints, stakeholder demos, and product roadmap for the final year capstone.
- **Team Lead, JUJUTSU CODERS** – Led Agile ceremonies, coordinated feature delivery, and presented the product pitch achieving Top 5 among 60+ teams.
- **Volunteer Coordinator, PAC HACK** – Coordinated logistics and participant support for 200+ attendees at a national-level hackathon.
